

CITIZEN WARNING

ACTIVISTS

ACTIVISTS are challenging the power and control we, the corporations and government, have over your life. They claim that we are exploiting you, that we are cutting down your forests, that we are poisoning your land and water, that we are destroying your planet, that we are abusing your human rights, that we are denying you your dignity.

But who are these ACTIVISTS?

ACTIVISTS are people who are concerned about the current way of the world and the future that we are creating for you. They are informed, passionate and motivated by a belief that they can create a fairer and more just world, where you, the people, not us, are in control. ACTIVISTS, are committed to undermining our power and exposing us for who we are. And they want to work in collaboration with you, the people, to create this better world.

We, the corporations and government, are alarmed at the extent to which you, the people, also challenge our authority. We feel compelled to urge you to stay away from ACTIVISTS and not be tempted to believe or even consider what they have to say.

It is our duty to control your opinion, the public opinion, at all cost. Therefore, we warn you, as we constantly warn the ACTIVISTS, that we will use all necessary force to maintain our control and expand our power.

We, the corporations and government, consider ACTIVISTS to be TERRORISTS. They threaten our ability to exploit you and the planet to increase our profits and power. We will consider you to be a TERRORIST if you join them to better your life and the world you live in. You have been warned.
